**Back End:** Node.js, Express.js, Python

**Database:** Mongo DB, MySQL

**Tools & Others:** VS Code, Post Man, Figma, Android Studio, Git & Github, JWT Authentication, Integration, Api.

---

## EXPERIENCE

**MERN Developer** | Technoboot Pvt Ltd | Bhubaneswar, India

**July 2023 –Feb 2024**

- Engineered robust application functionality by creating server-side logic, middleware, and web services with Express.js and Node.js; increased user engagement by 30% and decreased downtime by 15%
- Developed and deployed server-side logic, middleware, and web services using Express.js and Node.js; enhanced application performance by 40% and reduced server response time by 25%
- Architected and deployed robust web services with Express.js and Node.js, ensuring high application functionality and cutting server downtime by 50%, significantly boosting user retention rates by 20%.
- Engineered scalable server-side logic and middleware using Express.js and Node.js, enhancing application performance and reducing response time by 40%, which led to a 25% increase in user satisfaction.
- Integrated third-party APIs and services, leveraging OAuth, JWT, and other authentication protocols for secure data exchange.

---

## PROJECTS

### Real State Website

**Tech Stack:** MERN | Material-UI | Postman | Visual Studio Code

- Developed an Real State Website using React.js, Node.js, and MongoDB, ensuring a secure, user-friendly experience with Dynamic Data and Material-UI.
- Architected and launched a dynamic real estate website using React.js, Node.js, and MongoDB; enhanced user experience with Material-UI and saw a 35% rise in user retention rate within the first quarter.
- Engineered a real estate platform leveraging React.js, Node.js, and MongoDB, integrating secure authentication and Material-UI; boosted data-driven interactions and increased user engagement by 40% within three months

### Customer Relationship Management

**Tech Stack:** Mongo DB | React | Next.js | React Redux

- Developed a CRM Dashboard using React, Next.js, and React Redux for an engaging user experience.
- Implemented management features, enhancing the site's functionality and providing customers with a convenient way to managing features..
- Utilized Mongo DB for efficient data storage, ensuring seamless handling of admin dashboard features and services.

### Hotel Management

**Tech Stack:** MongoDB | React.js | React Redux | Node.js | PostMan

- Developed and launched a dynamic Hotel Management system with React.js, Node.js, MongoDB, Express, JWT, Middleware, and React Redux, leading to a 30% increase in operational efficiency and a 25% reduction in booking errors.
- Engineered a comprehensive Hotel Management Web & Admin Dashboard using React.js, Node.js, MongoDB, Express, JWT, Middleware, and React Redux, enhancing user experience and administrative efficiency by 40% within the first quarter.
- Utilized Mongo DB for efficient data storage, ensuring seamless handling of admin dashboard features and services.
